

From room workload to accepted service.

One connected workspace for hotels, cleaning companies, supervisors and frontline teams.

Rooms • Assignment • Inspection • Acceptance • Service desk • Reporting

Control the full room-readiness workflow.

TouteGestion keeps property structure, room status, staff ownership, evidence and handoffs connected from the first upload to final acceptance.

01 Prepare

Configure properties, floors, rooms, zones and participating teams.

02 Upload workload

Bring in daily room information and operational workload.

03 Assign

Balance work by roster, floor, zone or direct responsibility.

04 Clean & update

Frontline staff work from a focused mobile task and shift view.

05 Inspect

Supervisors review evidence, approve work or return it for correction.

06 Accept

Hotel-side users confirm readiness or raise a clear issue.

07 Follow up

Blocked access, maintenance and room issues stay in the service desk.

08 Report

Progress, historical workload and audit information remain available.

The right workspace for every role.

Responsibilities stay separated while the operational record stays connected.

Hotel managers

See room readiness, property status, acceptance, partners, reporting and billing without managing cleaners directly.

Cleaning companies

Coordinate teams across properties, balance workload, review exceptions and retain evidence.

Supervisors

Assign rooms, monitor progress, inspect work, manage re-cleans and handle blocked rooms.

Cleaners

Start a shift, see assigned rooms, report blockers, complete checklists and submit evidence.

Reception & finance

Use role-specific acceptance, reporting, finance validation, ledger and billing views.

Service teams

Track operational issues and maintenance-related blockers through a controlled queue.

Operational proof, exceptions and management visibility.

The product is built for the moments that normally fall into calls, paper lists and chat messages.

Inspection & evidence

Evidence stays attached to the work being reviewed.

Service desk

Blocked access, room issues and operational requests stay in one queue.

Disputes & rework

Rejected work and corrections remain traceable.

Lost & found

Lost-and-found activity can be recorded alongside property operations.

Previous workload

Historical workload remains searchable for management review.

Cleaner progress

Supervisors can review progress without chasing verbal updates.

Reports & audit

Operational reporting and audit views preserve accountability.

Finance controls

Finance validation, ledger and billing are available to authorized roles.

See the operation using your real workflow.

A guided demo can focus on the parts that matter to your hotel, cleaning company or service operation.
